**CONCOURS D'ELEGANCE  
BENEFITING MEADOW BROOK HALL**

## WELCOME MOTORSPORT ENTHUSIASTS!

Welcome to Waterford Hills now in its 27th year as one of the most successful club racing facilities in the country. A lot of the buildings you see now were not here when Waterford opened in 1938, but a lot of the cars you will see today were.

I came to the track as a spectator in 1976 and decided I had to get out there with the other dry drivers, it wasn't until a year later that I went through one of the highly respected racing schools that operate here. Throughout most of 1977 I raced in the stock class. That wasn't too bad a good way to get started that year I bought a well campaigned Corvette and I was off and running and having the time of my life. A year later my wife and I were bitten by the racing bug, from then on it was a 2 driver one car team, with what Waterford is for many people... the timing tower. That's what Waterford is for many people... a family affair and a place where life-time friendships are made.

But on to the business at hand. Looking back through some old Waterford programs, I saw some cars that may show-up here this weekend: Turner, Elva Courier, Bathub Porches, Opened wheel Coopers, MGA's, MG's, TD's and TC's, Bugeyed Sprites and a lot of cars older than these.

This is a first for Waterford Hills and Meadow Brook Hall, so sit back, get your camera ready and take a weekend trip with us back in time before the days of fat sticky racing tires and beautiful cars, join when you think you have seen some really old and beautiful cars. When you think you have seen some really old and beautiful cars. When you think you have seen some really old and beautiful cars.

## WELCOME RACE ENTHUSIASTS

Just seven short years ago, the Meadow Brook Concours became a reality. Don Sommer, Margaret Tymann and Dean Lowell Klund, the man who first suggested this activity to me saw this as a way of indulging in his favorite past time, and at the same time, dead fortunate that we have people like Don in this sport, for because of his foresight, we now have an event that can rival Pebble Beach in many respects.

The Meadow Brook Concours now has almost 200 cars in competition and the quality of these vehicles is second only to Pebble Beach. Additionally, it has a fund raising banquet the night before that also kicks off the Auto/Art Exhibit. This exhibit is must be in attendance and the success of this show and sale has in just four years made this the premier automotive art exhibit in America where the artist President of American Motors Corporation, Dick Teague. Credit for the set, we at last have the opportunity to launch this weekend as an event that will indeed set it apart from all others and by this I mean the addition of the Meadow Brook Historic Races at the Waterford Hills racing facility. This racing activity will do our the midwest, the event will attract many more enthusiasts than ever before, and come a three-day activity which will be much more exciting for spectators from outside the metropolitan Detroit area.

As a Meadow Brook Concours Committee Member for the last four years, it has given me a great deal of personal pride to see the increased interest that is being exhibited in the Concours and Automotive Art Exhibit. I know that with this increased activity, we now have an event that has certainly gained national acclaim for the Detroit area.

Welcome to the Meadow Brook Historic Races.
